Backend Developer & Technical Leader

Expert in Directing Human + AI Development Workflows | Early LLM/Agentic Development Adopter

Versatile technical leader with 20+ years of experience delivering innovative software solutions and modernizing legacy systems. Proven track record in backend development, infrastructure design, and team leadership across the Food, Restaurant, and Advertising industries. Skilled at leveraging emerging tools to accelerate delivery, improve code quality, and boost productivity. Adept at stakeholder communication and guiding teams through complex technical challenges.

Core Competencies:

- Full-Cycle Web & Mobile Applications Development
 - Futureproof Systems Architecture
 - Project Management
 - Troubleshooting & Issue Resolution
 - Stakeholder Communication
 - Legacy Codbases Support
-

Career History

Lead Developer — *Labrador OmniMedia Inc., Santa Rosa, US*

2016 – 2025

Tech Stack: Ruby, Rails, JavaScript, Flutter, Dart, AWS (EBS/EC2), Elasticsearch, Docker

- **Architected and developed** a food & beverage management platform with a web-based back office, integrating multiple POS systems and enabling **real-time wine inventory tracking**.
- **Led full-stack development** of customer-facing mobile apps using next-generation Flutter for cross-platform deployment.
- Directed **all development operations**: backend services, DevOps pipelines, automated backups, and third-party platform integrations.

- Partnered with business stakeholders to translate requirements into scalable technical solutions.
- Implemented robust **testing, debugging, and defect management processes**, improving release stability.

Key Achievements

- Modernized and maintained a large legacy Rails codebase, improving performance and security.
 - Mentored junior developers in best practices, API integrations, and scalable architecture.
 - Led ground-up reimplementation of the mobile application, enhancing UI/UX and maintainability.
-

Lead Web Developer — *ProFinda, London, UK*

2014 – 2016

Tech Stack: Ruby, JRuby, Python, Rack, Grape API, Redis, PostgreSQL, Elasticsearch, Docker

- Led a cross-functional team building AI-powered solutions using **Natural Language Processing, Machine Learning**, and **algorithmic recommendations**.
- Oversaw full-cycle development from requirements gathering to deployment, prioritizing tasks and reviewing code.
- Collaborated with R&D leadership to align features with strategic business objectives.

Key Achievements

- Designed and implemented NLP and ML architecture from scratch, enabling advanced search and matching capabilities.
-

Director of Engineering — *Helios Technologies, Odesa/Kyiv, Ukraine*

2012 – 2014

Tech Stack: Ruby, JavaScript, Rails

- Managed development teams for ID.net secure payment platform, TrafficFactory analytics platform, and Ant.com social search engine.
- Recruited, trained, and mentored engineering staff.
- Served as primary liaison between teams, management, and clients.

Key Achievements

- Established Odesa branch and built a high-performing team.
 - Designed scalable, high-performance architecture for ID.net.
-

Consulting Contractor / Web Developer — *Multiple Engagements*

2008 – 2016

Tech: Ruby, Rails, JavaScript, MySQL, PostgreSQL, Redis

Selected Engagements

- **Lead Backend Developer — Workforce Marketplace (Toptal, 2005–2008)**
 - Employee #1 at Toptal; led backend architecture, analytics platforms, and lifecycle improvements.
 - Optimized data pipelines and refactored core systems for scalability.
- **Full-stack Developer — Online Marketplace (Modnique.com)**
 - Managed development team; implemented DCI architecture and Docker/Ansible deployments.
 - Integrated multiple APIs (Google Analytics, Bronto) and developed asynchronous event tracking.
- **Senior Backend Developer — Y8.com**

- Led core backend development and legacy refactoring.
- Built a high-load asynchronous voting system and backend optimizations.

Education

Master's Degree in Economics — Odesa National Academy of Food Technologies, Ukraine
