Full-stack Developer & Technical Leader

Expert in Backend and Frontend Development | Early LLM/Agentic-assisted Programming Adopter

Versatile software developer and technical leader with 20+ years of experience delivering innovative software solutions and modernizing legacy systems. Proven track record in backend development, full-stack development, infrastructure design, and team leadership across the **Video on Demand**, **Human Resources**, **Restaurant**, and **Advertising** industries. Skilled at leveraging emerging tools to accelerate delivery, improve code quality, and boost productivity. Adept at stakeholder communications and guiding teams through complex technical challenges.

Core Competencies:

- Full-Cycle Web & Mobile Applications Development
 - Futureproof Systems Architecture
 - Project Management
 - Troubleshooting & Issue Resolution
 - Stakeholders Communication
 - Legacy Codbases Support
-

Career History

Lead Developer @ [TastevinApp.com](https://tastevinapp.com) — *Labrador OmniMedia Inc., Santa Rosa, US*

2016 – 2025

Tech Stack: Ruby, Rails, JavaScript, Flutter, Dart, AWS (EBS/EC2), Elasticsearch, Docker

- **Architected and developed** the food & wine management platform with a web-based back office (Rails, JavaScript).
- Integrated multiple **POS systems** using in-house agents (C#) and 3rd-party APIs (Rack, Grape).
- Enabled **real-time wine inventory tracking** (Google Firestore and then migrated to an in-house solution).
- **Led and programmed** core components of customer-facing mobile apps using Flutter for cross-platform deployment and customer base expansion.
- Directed **all development operations**: backend services, DevOps pipelines, backup strategies, cost-saving server solutions and third-party platform integrations.
- Partnered with business stakeholders to translate requirements into scalable technical solutions.
- Integrated robust **testing, debugging, and defect management processes**, improving release stability.

Key Achievements

- Modernized and maintained a large legacy Rails codebase (Rails 3 to Rails 7 migration), to improve performance, scalability and security.
 - Mentored developers in best practices of API integrations and scalable architecture.
 - Led ground-up reimplementation of the client-facing mobile applications, enhancing UI/UX and maintainability.
 - Developed from scratch two generations of Point of Sale system integrations according to changing customers' needs.
-

Lead Web Developer @ [ProFinda.com](#) — *ProFinda, London, UK*

2014 – 2016

Tech Stack: Ruby, JRuby, Python, Rack, Grape API, Redis, PostgreSQL, Elasticsearch, Docker

- Led a cross-functional team building AI-powered solutions using **Natural Language Processing, Machine Learning**, and **algorithmic recommendations** (Java, JRuby, Rails)
- Oversaw full-cycle development from requirements gathering to deployment, prioritizing tasks and reviewing code.
- Collaborated with R&D leadership to align features with strategic business objectives.

Key Achievements

- Designed and implemented NLP and ML architecture from scratch.
 - Implemented advanced ML-based search and NLP-based matching capabilities, and resume parsing 7 years before modern LLMs' public release.
-

Senior Staff Engineer @ [Helios](#) — *Helios Technologies, Paris, France*

2012 – 2014

Tech Stack: Ruby, JavaScript, Rails

- Managed development teams for ID.net secure payment platform, TrafficFactory and Ant.com social search engine and kept **Lead Developer** (Rails) position at the same time.
- Recruited, trained, and mentored engineering staff.
- Served as primary liaison between teams, stakeholders, and clients.

Key Achievements

- Established the Odesa (Ukraine) branch and built a high-performing team.
 - Designed and implemented a scalable, high-performance architecture for [ID.net](#).
-

Consulting Contractor / Senior Backend Developer — *Selected Engagements*

2008 – 2016

Tech: Ruby, Rails, JavaScript, MySQL, PostgreSQL, Redis

Selected Engagements

- **Lead Backend Developer — Workforce Marketplace (Toptal, 2005–2008)**
 - Employee #1 at Toptal.com; led backend architecture, analytics platform, and app lifecycle improvement strategies implementation.
 - Optimized data pipelines and refactored core systems for scalability (Rails).
 - **Full-stack Developer — Online Marketplace (Modnique.com)**
 - Managed development team; Full-stack development, implemented DCI architecture and Docker/Ansible-based deployments.
 - Integrated multiple 3rd-party APIs and developed an asynchronous event tracking system for better scalability.
 - **Senior Backend Developer — Y8.com**
 - Led core backend development and legacy code refactoring (Rails).
 - Built a high-load asynchronous voting system and backend optimization tasks that allowed the introduction of cost-saving server solutions.
-

Education

Master's Degree in Economics — ODESA NATIONAL UNIVERSITY OF TECHNOLOGY, Ukraine
(1999-2004)

Languages

- English (CELPPI 9/9/9/9 - Registration number: 301095612)
- Ukrainian (Native)
- Russian (Native)
- French (Basic Proficiency)
